DETAILED ACTION

Response to Amendment

The Amendment, filed on 3/30/04, has been entered and acknowledged by the Examiner.

Claims 4-6 have been canceled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in the claim, and specifically comprising the limitation, that a part of the electron shield formed of a material having a smaller anhysteretic magnetic permeability than another part of the electron shield, the shadow mask, the mask frame and the inner magnetic shield.

The prior art of Hirasawa teaches all of the limitations of claim 1, except for a part of the electron shield being formed of a material having a smaller anhysteretic magnetic permeability than another part of the electron shield.

The prior art of Kokubu discloses an electron shield 11, Fig. 3, with a plurality of holes 111 and therefore at least one part of the electron shield has a smaller anhysteretic magnetic permeability than another part of the electron shield as well as the shadow mask, the mask frame, and the inner magnetic shield when an applied magnetic field is 800 A/m (10 Oe). It however, does not teach a part of the electron shield being formed of a material that has a smaller anhysteretic magnetic permeability than another part of the electron shield as well as the shadow

mask, the mask frame, and the inner magnetic shield when an applied magnetic field is 800 A/m (10 Oe), as claimed.

Regarding claims 2-3, claims 2-3 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
